

STATE LEVEL ENVIRONMENT IMPACT ASSESSMENT AUTHORITY, PUNJAB
Ministry of Environment and Forests, Government of India

No. SEIAA/OM/2014/3327

Dated: 12.11.2014

OFFICE MEMORANDUM

It has been observed that the certificates issued by various MCs/Local Bodies allowing the project proponent to connect the project sewer line with the public sewer line do not contain information such as quantity of domestic effluent of the proposed project to be handled by public sewer & STP and existing status of sewer connectivity in the area etc.

The matter was deliberated upon by SEIAA & SEAC in its 6th combined meeting held on 17.10.2014 and it was observed that as per para 2.13 of Form 1-A, the project proponent is required to provide information regarding on site facilities to be made for the collection, treatment and safe disposal of sewage and give details of quantities of wastewater generation, treatment capacities with technology and facilities for recycling and disposal.

Accordingly, it has been decided that permission letter of Local Bodies should state that the concerned Local Body will take the domestic effluent of the project specifying the quantity and existing status of the sewer connectivity in the area. In the absence of availability of connectivity with the public sewer, the project proponent shall submit proposal for alternate disposal arrangements for the treated effluent.
