Faridkot.

Sub: Application for grant of environmental clearance for Industrial Project to be developed by M/s Mahasagr Cement Company Pvt. Ltd., Vill. Mehmuaana, Sadiq Road, Faridkot.

This has reference to your application for grant of environmental clearance for establishment of cement grinding plant of capacity 140 TPD by M/s Mahasagr Cement Company Pvt. Ltd. at Vill. Mehmuaana, Sadiq Road, Faridkot. The case was considered in the 23rd meeting of State Expert Appraisal Committee held on 6/6/2009.

After detailed deliberations on the presentation by the Members, it was decided to categorise the project into B1 category and that the project proponent should submit an Environment Impact Assessment Study Report. After further deliberations on the proposed Terms of Reference (TOR) suggested by the project proponent, the Committee approved the following Terms of Reference for Environmental Impact Assessment Study of the proposed project:-

1. All the coordinates of the plant site should be provided with toposheet.
2. The study area should cover an area of 10 km. radius around the proposed site.
3. Land use pattern of the study area as well as the project area shall be given.
4. Location of any National Park, Sanctuary, Elephant / Tiger Reserve (existing as well as proposed), eco-sensitive area, protected area, interstate boundary, migratory routes, if any, within 10 km. of the project site shall be specified and marked on the map.
5. Topography of the area should be given clearly indicating whether the site requires any filling. If so, details of filling, quantity of fill material required, its source, transportation etc. should be given.
6. Impact on drainage of the area and the surrounding area should be specified.
7. Information regarding surface hydrology and water regime and impact on the same, if any, due to the project.
8. Sustainability study for groundwater in the existing tubewells and quality of groundwater as per BIS:10500 (drinking water standards) should be provided.
9. One season site-specific meteorological data (except monsoon) shall be provided.

10. One complete season Ambient Air Quality (AAQ) data (except monsoon) to be given along with the dates of monitoring. The analysis should be carried from MoEF / NABL accredited lab and the copies of the test reports need to be attached. The parameters to be covered shall include SPM, RSPM, SO₂ and NO_x. Monitoring shall be carried out for at least 6 different locations all around the project within 10 km. radius. The location of the monitoring stations should be so decided so as to take into consideration the pre-dominant downwind direction, population zone and sensitive receptors including reserved forests. There should be at least one monitoring station in the upwind direction.
11. Impact of the project on the AAQ of the area, details of the model used and the input data used for modelling should also be provided. The air quality contours may be plotted on a location map showing the location of project site, habitation nearby, sensitive receptors, if any. The wind roses should also be shown on this map. It may be kept in view that concentration suspended particulate matter (SPM in the stack emissions should be less than 150 mg/Nm³.
12. Source of water and its availability should be given.
13. Details of rainwater harvesting including its pre-treatment method.
14. Details of water balance taking into account the reuse and re-circulation of effluents, if any, should be provided.
15. Details of green belt i.e. land with not less than 1000 trees per hectare giving details of species, width of plantation, planning schedule etc.
16. Details regarding infrastructure facilities such as sanitation, restroom etc. to be provided to the labour force during construction as well as to the casual workers including truck drivers during operation phase.
17. Public hearing points to be raised and commitment of the project proponent on the same. An action plan to address the issues raised during public hearing and the necessary allocation of funds for the same should be provided.
18. Measures of socio economic influence to the local community proposed to be provided by project proponent. As far as possible, quantitative dimensions to be given.
19. Impact of the project on local infrastructure of the area such as road network and whether any additional infrastructure would need to be constructed and the agency responsible for the same with time frame.
20. Environment Management Plan (EMP) to mitigate the adverse impacts due to the project along with item-wise cost of its implementation.
21. Risk assessment to be undertaken. Based on the same, proposed safeguard measures should be provided.
22. Any litigation pending against the project and / or any direction / order passed by any Court of Law against the project, if so, details thereof.
23. A detailed environmental protection budget would also be presented and earmarked.

The source of getting secondary data, wherever applicable, should be intimated alongwith its reference. Generic structure of Environment Impact Assessment Document, given in Appendix-III of EIA Notification 2006 shall be followed in preparation of Rapid Environmental Impact Assessment report.

Besides the above, the following general points / guidelines will also be followed:

- a) All documents to be properly referenced with index, page numbers and continuous page numbering. A uniform system of units to be used while reporting data.
- b) Where data is presented in the report especially in table, the period in which the data was collected and the source should invariably be indicated.

The industry should prepare draft rapid EIA / EMP Report for its project based on above Terms of Reference and apply to the Chairman, Punjab Pollution Control Board for conducting public hearing as per the provisions of EIA Notification, 2006 on submitting EIA / EMP / Executive Summary Report prepared by the industry as per TORs.

After completing the process of public hearing / public consultation, the industry should submit final EIA / EMP to the State Expert Appraisal Committee after incorporating all the issues raised during public hearing / public consultation for Appraisal of its project.

(Malvinder Singh)
